Model: GPB-A9

FOB Ningbo / Shanghai Price

20' GP	(155 pieces)	\$355
40' GP	(310 pieces)	\$345
40' HQ	(345 pieces)	\$340

Traits

- **GP3 Engine**
- **CNC Aluminum Linkage board**
- **Direction Tranquilization Set**
- **Middle Asia Tires**
- **YAMAHA Chain**
- **Chinese-Japan made Magnetic Motor**
- **Brand Bearing**
- **Japanese cylinder head**

Description

Engine	40cc water-cooled, single cylinder, 2-stroke
Fuel type	Petrol, 1:25 engine oil mixing
Fuel tank capacity	1.8L
Compress ratio	16.5:1
Driving mode	Chain
Starting system	Pull start
Tire (front/rear)	90/65-6.5, 110/50-6.5
Brake system (front/rear)	Disc brake (manual)
Rated power and rotate speed	4.5kw/15000rpm
Max torque and rotate speed	4N.M/10000rpm
Max speed	95km/h
Max loaded	110kgs
Dimension (L×W×H)	960×500×630mm
G.W./N.W.	27/24kgs
Carton Size	1010×290×665mm
Quantity	155pcs/20'GP; 310pcs/40'GP; 345pcs/40'HQ

The differences between ours and others

Ours	Others
Fairing	
We have 8 pieces fairing tool for one set.	6 pieces
Weight of our fairing is 100 grams.	70 grams
We use brand new material.	Less quality material
Frame	
We do our own welds and frame production thus ensuring quality, weight of our frame is 11 kilograms.	Are bought from the local market and weight 9 kilograms.
Rim	
The rims are machined.	Molds and have more imperfections and be easily broken.
Tire	
Buy and use high quality tires.	Less quality tires
Alloy Parts	
Machined parts and several CNC parts	Molds thus less quality
Engine	
We use 40cc water cooled engines with patent which made in our factory.	39cc normal engines

Painting

We do 2 coats of paint and 1 clear coat.

1 coat only.

Decals

We use high quality Die-Cut decals and own the right of our designs.

Less expensive quality and are of generic design.

Muffler

We use bigger pipes and of better quality material.

Less quality.

Packing

We are the first and continue to use whole foam packaging for superior protection.

Use generic foam molds thus resulting in less protection and prone to scratches and damages.

Detailed pictures

Aluminum Alloy linkage boards connect four independent parts of the frame

Direction Tranquilization Set

Double Front Disc Brakes
